

ITAC SecureFile® MFT

Secure Managed File Transfer Solution

ITAC SecureFile® MFT » solution for automated and secure file transfer to optimize, centralize and organize the file sharing processes between offices, customers and business partners using standard encryption and digital signatures globally accepted, without requiring modification of the applications that generate or receive these files.

BENEFITS

- Decrease the risk of fraud and leak of information for your organization and your customers, minimizing the contact of the user with the confidential files.
- Accelerates the compliance of the government regulations for the protection of information, such as PCI, ISO27001, HIPPA, etc.
- Decrease of the operating load related with the monitoring and control of the processes of file transfer.
- Centralized and organized administration of the process of secure file transfer.
- Cost reduction in the process of File sharing.
